# What is ThinkCERCA?

Read. Write. Grow

ThinkCERCA is a web-based program for literacy instruction for students. Students learn how to consume information, think about it critically, and express their thoughts effectively in ELA, social studies, science, and math.

Audience

How will my child use ThinkCERCA?

- Students will read a text closely for comprehension, build an argument by collaborating with peers, and write a paper or alternative project that articulates their argument.
  - Lessons that focus on narrative writing and informational writing are also available.
- Students can see comments from teachers on areas of growth focus and progress over time. Shared reports help all teachers work together to personalize each students' learning plan.
